

ATCA CUSTOMS AUTHORITY

OFFICIAL IMPORT NOTICE — ATCA/BATT/2026/N01

Effective: 2026-07-01 | Ref: ATCA/BATT/2026/N01

Due to an increase in supply chain irregularities and to enforce critical infrastructure security measures, the ATCA is mandating strict new documentation requirements for all lithium-ion battery imports (specifically classified under HTS 8507.60.00).

Effective Date: July 1, 2026

All importers must comply with the new documentation requirements outlined below.

Subject: Enhanced Documentation Requirements for Lithium Battery Imports

AGENCY: ADIAS Trade & Compliance Authority (ATCA).

ACTION: Final Rule and Administrative Command.

SUMMARY: Due to an increase in supply chain irregularities and to enforce critical infrastructure security measures, the ATCA is mandating strict new documentation requirements for all lithium-ion battery imports (specifically classified under HTS 8507.60.00).

Mandatory Requirements

Effective July 1, 2026, all importers processing shipments of lithium batteries with an entered aggregate value exceeding \$50,000 USD must electronically transmit a 'Form 8-BAT Supply Chain Provenance Certificate' via the ACE portal before the vessel arrives at the port of entry.

Penalties for Non-Compliance

Failure to provide this documentation by the deadline will be considered a severe violation of 19 U.S.C. § 1592. The authority will enforce:

- An immediate halt on the clearance of goods at the port.
- A mandatory civil penalty of \$25,000 per violation.
- Potential suspension of the importer's continuous bond.
